

# Youth Engagement through Graphic Design

Project Title	Youth Engagement through Graphic Design
Project Summary	Engage youth through the popular Junior Ranger program. Research, develop and design four new Junior Ranger booklets aimed at creating a memorable experience while instilling stewardship values into our visitors. This project would revise outdated programs at Fort Caroline and Kingsley Plantation.
Country	United States

## Project Description

The Junior Ranger program serves thousands of kids each year and can help shape not only how they treat the National Parks but also the greater world around them. Help build the next generation of stewards through the creation of both visually appealing and meaningful content. We are developing four booklets, aimed at different ages and targeting diverse subjects. Timucuan Ecological and Historic Preserve includes Fort Caroline National Memorial and Kingsley Plantation which each operate different Junior Ranger programs. Content will also be made accessible and screen readable in full compliance with the Americans with Disabilities Act.

## Required Skills or Interests

### Skill(s)

Design thinking

Editing and proofreading

Educational design

Graphic design

## Additional Information

Visit our website at <https://www.nps.gov/timu/learn/kidsyouth/beajuniorranger.htm> to learn more about the current program and the opportunity for improvement and innovation.
